(937) 225-4906

www.mcohio.org/services/jobandfamily/services/medicaid/adult_protective_services.html

Adult Protective Services (APS) investigates suspected abuse, neglect, self-neglect and exploitation of persons primarily age 60 and over. An assessment is done to determine what services are available to help the client. Our goal is to help clients remain independent in their homes as long as possible by preventing, reducing or remedying conditions that may cause their endangerment.

Prior to a home visit, we like to know as much about the person and problem as possible. In addition to a description of the problem that requires our attention, please provide the following information about the client:

- Name, address, phone number
- Social Security number
- Date of birth
- Interested or involved family, friends, or caregivers

Routine referrals must be started within three working days and emergencies within 24 hours. Upon completing a 30-day investigation, caseworkers work with the client to decide if the case should remain open. If the caseworker determines the client lacks the capacity to make such a decision, the case can be kept open longer with the client's consent. Most cases are resolved in 60 days or less.
